

MCSWCD Tree & Shrub Program

Frequently Asked Questions

1. How can I order trees?

There are two ways to purchase trees:

- *We have a pre-order program where you can place a pre-order by March 6th and pick up your trees from 9:00 am – 5:00 pm on April 23rd & 24th.*
- *You can also come to our overstock sale where you will be able to purchase trees without having to pre-order. Our overstock sale occurs on April 25th from 9:00 am – 11:00 am and is on a first-come, first-serve basis (not all species are guaranteed to be available).*

2. Where do I pre-order?

You can pre-order trees by doing one of the following:

- *Ordering online from our square store (<https://squareup.com/store/monroe-county-soil-and-water-conservation-district>)*
- *Emailing us a copy of the order form found on our website (www.monroecountyswcd.org)*
- *Mailing us a physical copy of the order form.*

** Orders placed through mail or email must be accompanied by a check or credit card information.*

3. What kind of trees can I buy?

We offer 24 species of trees/shrubs as well as multiple seed mixes, tree packs (where multiple species of tree are sold together) and enhancement items like fertilizer tablets, birdhouses, and more!

*The trees we sell are typically 1-3 years old and are between 12-24" tall; **we do not sell full-grown trees**. Since our trees are quite small and sold just as leaves begin to break bud, many of them will appear to be lifeless; this is not the case! If planted in the right conditions the roots will take to the soil and your trees should grow well.*

**Please refer to our tree information sheet and plantings tips page for more information on how to get your trees to succeed.*

4. Can I purchase individual trees?

No, we only offer trees in packs of 10, 50, or 100 (conifers only).

5. Where can I learn more about the trees you are selling?

Please refer to the catalog on our website for detailed information on all of the items we are offering this year!

6. What's the difference between a tree pack and buying other trees?

Our conservation tree packs offer you the chance to buy multiple species of tree instead of just one species. Usually these packs contain trees that are all similar in some way, so you can have trees with the same characteristics. For example, our wild berry pack contains four different species, but each are known for producing berries.

7. I bought trees from this sale last year and they all died, what gives?

Trees – especially young seedlings - are very sensitive to the environment they are placed in. Many times when trees die it is because there is an incorrect amount of water, sunlight, nutrients, or various other factors. Unfortunately, many young trees are highly susceptible to disease and pests that can be acquired through the soil, air or from other nearby plants. It can be very difficult to determine the suitability of certain trees for your property and also prevent plant diseases, that is why we recommend using our [Plant Fact Sheet](#) and [Planting Tips page](#) on our website! These resources can help guide you into purchasing a tree that will not only look good on your property, but is suited to grow well in specific conditions of your yard.

*If you have any questions that go beyond what this FAQ addresses, please call us at 585-753-7380 or email matthewgallo@monroecounty.gov.
